Winners Project

The Winners Project is an educational program with 3 levels of progression. It has been developed by the IRCAD's gynecology team led by Professor Wattiez, in collaboration with The European Academy of Gynaecological Surgery, IRCAD, and WebSurg.

This is a program dedicated to gynecologists only. It will hopefully be developed for other specialities in the future.

*** BACHELOR IN ENDOSCOPY**

The Bachelor Level provides basic knowledge in laparoscopy. This level is highly connected to the Academy and validates psychomotor skills and pelvic exercises. The Academy provides the trainee with a certificate. To move up to the next WINNERS level, you must pass a test.

Theoretical
TESTT: 50 questions about this level's topics

Practical
LASTT: psychomotricity test with 3 exercises to test camera navigation, eye-hand coordination
SUTT: suturing test
HYSTT: uses the specific uterine environment and approach as a model for the exercises.

START Winners ID : 561687

* Reproductive Endoscopic Surgery

Winners Project and ESHRE have introduced a new certification for Reproductive Endoscopic surgeons, the first international certification in the field of Reproductive Surgery.

ECRES is a new certification programme in reproductive endoscopy. This unique programme provides an opportunity for gynecologists with a special interest in reproductive surgery to validate their hysteroscopic and laparoscopic skills and experience, to establish their status as reproductive surgeons, and to join an élite group of specialists.

Background
Evidence-based data show that reproductive surgery performed by well trained and experienced specialists can help fertility preservation and significantly improve the outcome of ART treatments. Moreover, skilful surgery can reduce patient pain and the risk of complications, and thereby improve quality of life.
